Knowledgeable in HTML5, CSS3, Javascript ES5/ES6, JQuery, PHP,

Coach Assistant — *Created for rostering a soccer team's players*

This application is used for soccer coaches. The coach may input his team's players and may also create new team formations. The coach can then visually place the players on the field. The roster can be saved for later use.

Travel Plan — *Created to assist with finding events and places of interest around the world. Built in translator included.*

This application allows the user to find events, points of interest, as pictures of local scenery within the distance of the map pointer the user places through drag and drop on a map or by entering a region in a search bar.

Chrome Developer Tools, React, Redux, Mocha, Chai, NodeJS, MongoDB, Mongoose, SQL, some D3.js, working with and creating APIs
